

## DELETE POLICY

### UNIVERSAL PRECAUTIONS

The following procedures shall be followed for all accidents or injuries involving the spilling of blood or body fluids:

1. Gloves shall be worn while caring for students and during cleanup of surfaces.
2. Articles or sharps soiled with blood or body fluids are to be disposed of in biohazard containers in the school health office.
3. Surfaces should be disinfected with a ten percent solution of chlorine bleach or equivalent.
4. Hand washing after contact with any blood or body fluid is mandatory, even if gloves are worn.
5. Blood or body fluids of a child known to have HIV infection/AIDS should be treated especially cautiously, but the above procedures should be followed with all students and individuals.
6. Any student or employee coming into direct contact with another individual's blood or body fluids should consult the school nurse immediately.

### BLOODBORNE PATHOGENS EXPOSURE CONTROL PLAN

The Superintendent shall develop and implement a Bloodborne Pathogens Exposure Control Plan pursuant to Subchapter H of Chapter 81 of the Texas Health and Safety Code and the rules promulgated there under by the Department of State Health Services. [See DBB(REGULATION)]
