High schools shall compute class rank for the purpose of graduation ceremonies for local honors by utilizing spring semester grades based on work completed through the end of the third nine-week grading period of the school year. The top two percent (high honors group) shall be determined from the honors group. Honoring the top two percent at the graduation ceremony shall be based on the use of final grades for the spring semester.

Multiple credit courses shall be calculated in the same manner as a single credit course multiplied by the number of credits attempted.

If a student repeats a course to make up a failure or loss of credit due to attendance, both courses and grades will be recorded on the academic achievement record. In determining the student's GPA for class ranking, the courses and grades are computed as if each were a separate and different course. A student may not repeat a course where credit has been previously awarded.
